

# RS485 ISOLATED REPEATER

## INTRODUCTION

The DCC302 is an optically isolated RS485 to RS485 line repeater that can be used to isolate a piece of equipment from the rest of the network. As a repeater, it extends the distance of an existing RS485 network an additional 1.2 km (4000 ft). Data signals and the power inputs connect to the terminal block.

The repeater operates on an external 18~36 VDC power supply. The enclosure can be easily mounted on a standard 35mm DIN rail, and also surface mounted.

## FEATURES

- Extend distance of an existing RS485 network by upto 4000 feet
- 1800V optically isolated data lines
- 40 to 80°C operating temperature
- Modbus ASCII/RTU
- Provides mutual isolation between the two RS485 ports and power supply
